

CLIFTON PACKAGING GROUP LTD

the total packaging solution

Clifton Packaging are pleased to introduce **CRYSTA™** FILM - a radical new range of high gloss, crystal clear, easy forming, and excellent-performance barrier films for both top and bottom web applications.

The **CRYSTA™** family of films features a revolutionary multi-layer co-extrusion process with unique and innovative cooling properties allows the films to crystallize giving you perfect clarity.

CRYSTA™ family of films are production friendly and perform consistently for your most demanding applications.

CRYSTA™ FILM & FORM have been specially designed and engineered to perform on all thermoforming machines for the majority of applications.

The unique mechanical properties of **CRYSTA™** film allows for downgauging without losing any reliability or protective properties required for your vacuum packing and MAP applications.

Characteristics

- Exceptional optical clarity.
- High gloss finish.
- Lower form & seal temperatures.
- Improved draw depth properties.
- Excellent memory retention.
- Superior hot tack properties.
- Sealability through contaminates.
- Pasteurisable upto 100°C.
- Structure not affected by moisture.
- Excellent puncture resistance.

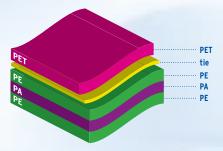

Applications

- Fresh Meat.
- Fish.
- Poultry.
- Sausages and Cured Meats.
- Cooked Meats.
- Cheese.
- Bread.
- Sauces and Soups.
- Processed Produce.
- Boil in the Bag and Pasteurization.
- Ready Meals.

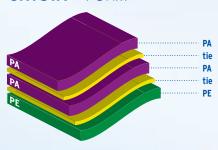

CRYSTA™ FILM

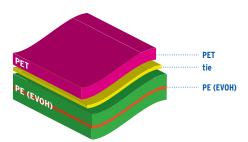

CRYSTA™ FORM

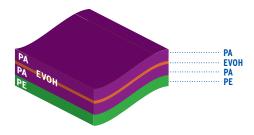

- Non formable barrier top web.
- High gloss finish.
- Non curling with good hot tack seal to **CRYSTA™** base webs.
- Available gauge: 65-75 microns.
- Formable barrier base web.
- Excellent memory retention.
- Improved draw depth properties for excel lent forming and better corner wall thick ness over standard films.
- Available gauge: 65-225 microns.

Application Vacuum Packaging, MAP, Boil in Bag, Pasteurization & Sterilization upto 100°c.

CRYSTA™ FILM B

CRYSTA™ FORM B

- Non formable high barrier top web.
- Sandwiched EVOH barrier for better protection.
- Non curling with good hot tack seal to **CRYSTA™** base webs.
- Available gauge: 65-75 microns.
- Formable high barrier base web.
- Improved draw depth properties for excel lent forming and better corner wall thick ness over standard films...
- Available gauge: 65-225 microns.

Application Vacuum Packaging, MAP. For oxygen sensitive and long shelf life products such as cooked meat products, long life bread and dairy.

Packing Specification

	Thickness		Metres	Metres per Pallet		
Material Code	μm	F N	F Per Reel	< 325mm	325 - 600mm	> 600mm
CF 501 65 μm	65	Χ	1,100	26,400	17,600	8,800
CF 501 75 μm	75	Χ	800	19,200	12,800	6,400
CF 501 90 μm	90	Χ	700	16,800	11,200	5,600
CF 501 100 μm	100	Χ	700	16,800	11,200	5,600
CF 501 125 μm	125	Χ	550	13,200	8,800	4,400
CF 501 150 μm	150	Χ	450	10,800	7,200	3,600
CF 501 175 μm	175	Χ	400	9,600	6,400	3,600
CF 501 200 μm	200	Χ	350	8,400	5,600	2,800
CF 501 225 μm	225	Χ	300	7,200	4,800	2,400
CL 451 65 μm	65)	X 1,100	26,400	17,600	8,800
CL 451 75 μm	75		X 800	19,200	12,800	6,400
CF 501 B 65 μm	65	Х	1,100	26,400	17,600	8,800
CF 501 B 75 µm	75	Χ	800	19,200	12,800	6,400
CF 501 B 90 µm	90	Χ	700	16,800	11,200	5,600
CF 501 B 125 μm	125	Χ	550	13,200	8,800	4,400
CF 501 B 150 μm	150	X	450	10,800	7,200	3,600
CF 501 B 175 μm	175	Χ	400	9,600	6,400	3,600
CF 501 B 200 µm	200	Χ	350	8,400	5,600	2,800
CF 501 B 225 μm	225	Χ	300	7,200	4,800	2,400
CL 451 B 65 μ m	65)	X 1,100	26,400	17,600	8,800
CL 451 B 75 μm	75)	X 800	19,200	12,800	6,400

F = Formable NF = Non Formable B = With EVOH HB = With Thicker EVOH Typical packing specs but may vary fo specific applications.

OPTIONS

- Blue tint.
- Peelable seal.
- Antifog coating.
- Corona treated for printing.

For further information please contact one of our film technicians who will be able to help you with the products we supply engineered to suit your specific market and product application.
